Since its first meeting in Parma in 2011, six editions of the EFLM Conference on Preanalytical Phase have been organized gathering more than 2500 participants in presence along the years.

The 7th edition of the EFLM Conference on Preanalytical Phase is focused on the improvement of the preanalytical phase through innovation and sustainable solutions. The program has been tailored by the scientific committee to update the knowledge in the field and to create an open forum for interactive discussion. In addition to formal lecturers, round tables and poster sessions will be organized

The guiding principle of this conference is to be different, pragmatic, practical and interactive, to address some most common preanalytical challenges, raise questions and offer answers and solutions.

Save the date! We do hope to see you in Padova.
